

Record ID	PWS ID Number	Lead Service Line Classification	Reported Date	Current Number
1	La 1099002	Lead SL	10/15/2024	0
2	La 1099002	Galvanized Requiring Replacement SL	10/15/2024	0
3	La 1099002	Non-Lead SL	10/15/2024	1,387
4	La 1099002	Lead Status Unknown SL	10/15/2024	0

Public Water Supply (PWS) & Inventory Information

PWS Name:	Bayou Teche Water Works, Inc
PWSID:	La 1099002
Enter Date Planned to Report to LDH:	10/15/2024
Is this the Initial Inventory or an Inventory Update?	Initial Inventory
PWS's Preferred Point of Contact	Name:
	Phone:
	Email Address:
	Ricky Frederick
	337 519-3807
	rfrederick@btwaterworks.com

Part 1: Historical Records Review

Type of Record	Describe the Records Reviewed for Your Inventory
1. Previous Materials Evaluation <i>Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.</i>	0
2. Construction Records, Ordinances, and Plumbing Codes <i>Examples: Codes, Ordinances or rules of services that prohibited lead piping, permits for installing or replacing service lines.</i>	
3. Water System Records <i>Examples: Capital improvement plans. Standard operating procedures. Engineering standards.</i>	
4. Distribution System Inspections and Records <i>Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.</i>	
5. Other Records	

Part 2: Identifying Service Line Material During Normal Operations

1. During which normal operating activities are you collecting information on service line material? Check all that apply.

- | | |
|--|---|
| <input checked="" type="checkbox"/> Water meter reading | <input checked="" type="checkbox"/> Water main repair or replacement |
| <input checked="" type="checkbox"/> Water meter repair or replacement | <input checked="" type="checkbox"/> Backflow prevention device inspection |
| <input checked="" type="checkbox"/> Service line repair or replacement | <input checked="" type="checkbox"/> Other |

If "Other", please explain:

New meter installs.

2. Did you develop a policy or standard operating procedure to collect service line materials during routine activities?

- Yes No

If "Yes", please describe:

Check customer service line during routine customer service calls.

Part 3: Service Line Investigations

1. Identify the service line investigation methods your system used to prepare the inventory (check all that apply). If a water system chooses an investigation method not specified by the state under 40 CFR §141.84(a)(3)(iv), state approval is required. **Note that investigations are not required by the LCRR but can be used by systems to assess accuracy of historical records and gather information when service line material is unknown.**

| <input checked="" type="checkbox"/> Visual Inspection | <input type="checkbox"/> Predictive Modeling |
| <input checked="" type="checkbox"/> Customer Self-Identification | <input type="checkbox"/> Statistical Analysis |
| <input checked="" type="checkbox"/> Mechanical Excavation | <input checked="" type="checkbox"/> Other |
| <input type="checkbox"/> Vacuum Excavation | |

If "Other", please explain:

Customer application dates:

2. If the system utilized Predictive Modeling or Statistical Analysis, please briefly describe the process below:

Part 4. Inventory Summary Table ¹

When you are using the **Service Line Information** worksheet, the classifications in the Column "Material Classification for the Entire Service Line" (Column M) will be used to calculate the total number of service lines for each of the four material classifications below.

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead. ²	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	1,387
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	0
TOTAL		1,387

Notes

¹This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

²A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines.

Part 5. Public Accessibility

How are you making your inventory publicly accessible? Check all that apply. *Remember that if your system serves > 50,000 people, you **must** provide the inventory online.*

- | | |
|--|---|
| <input type="checkbox"/> Interactive online map | <input type="checkbox"/> Printed tabular data |
| <input type="checkbox"/> Static online map | <input type="checkbox"/> Information on water utility mailings or newsletter |
| <input checked="" type="checkbox"/> Online spreadsheet | <input type="checkbox"/> Hard copy information available in water system office |
| <input type="checkbox"/> Printed service line map | <input type="checkbox"/> Other |

If "Other", please describe:

If the inventory is available online (i.e., system's website, etc.), provide a link to the website below:
